## LOW-BOY ANGLE DRESSER

WHEEL DRESSER
SERIES 191:

- For dressing surface wheels
- Adjusts easily from 0-8"
- Uses standards $3 / 8$ " shank diamonds
- Supplied complete with diamond

SERIES 191:

| Order No. | Description | Price |
| :--- | :--- | :--- |

| 92036 | GT6 | 7/16" | $1 / 4 \times 3 / 4 \times 5 / 16$ " at a $15^{\circ}$ Angle | Over 20" Dia. |  |

## TechTip

- Tool should have full face contact with the wheel.
- When using a new tool, 3-5 passes at .005 " per pass should be taken to expose the diamonds.
- Infeed per pass not to exceed .003 " (.0015" for a Medalist product).
- Traverse rates may range from 6-10" per minute.
- Use coolant whenever possible.
- To optimize applications using Medalist abrasives and/or tools, normal dressing parameters must change. Significant reductions in the amount of infeed and frequency of dress will result in substantially lower cost per part ground.
- It is the user's responsibility to refer to and comply with ANSI B7.1

MEDALIST SINGLE POINT DRESSERS FOR CERAMIC AND SILICON CARBIDE WHEELS

| Features: | Benefits: |
| :--- | :--- |
| - Broad shape, long lasting | - Fast truing and dressing action |
| diamond | Specifically designed as an eco- |
| - Each diamond is hand selected | nomical alternative for dressing |
| for stone shape, quality and Medalist abrasives <br> structural integrity  <br> - Multiple purpose Accommodates most straight <br>  dressing and minor form dress- <br>  ing applications |  |
|  | - Stands up to Medalist abrasive |
|  | sharpness: can also be used to <br> dress conventional abrasives |

Designed for truing and dressing of Medalist abrasive surface and cylindrical grinding applications in toolrooms, machine shops and light industrial applications. Engineered to withstand Medalist abrasive grinding wheel dressing pressures. Furnished with specially selected diamonds, the Medalist single point tool has the versatility to be used on conventional abrasives with significant benefits. Best choice for Medalist abrasive when a disposable product is preferred.

CONVENTIONAL SINGLE POINT DRESSERS

## FOR ALUMINUM OXIDE WHEELS

Features:

- Well defined sharp diamond point
- Accommodates most straight dressing and minor form dressing applications

Designed for truing and dressing of conventional abrasive surface and cylindrical grinding operations in toolrooms, machine shops and light industrial applications. Best choice when a disposable product is preferred.

Benefits:

- Fast truing and dressing action
- Economical choice for dressing conventional abrasives

Available in either 3/8" or 7/16" Diameter Shank

## RADIUS DRESSER

SERIES 191:
For Surface Grinders

This radius dresser shapes and dresses grinding wheels from below so that there is no need to remove the grinder wheel guard. The shaft is of hardened ground steel, turning in a cast iron bearing that permits very fine adjustment. Spindle is spring loaded. For use with any $1 / 2$ " shank diamond. Diamond not included.

Convex radii up to...... 1 (3/3/4"
Concave radii up to..... 4 "
Width..... $2-1 / 4^{\prime \prime}$
Length.....7"
Height..... $5^{\prime \prime}$
Weight..... 6lbs.

- Extremely accurate, this radius and angle dresser can dress 2 angles tangent to a radius in one continuous motion to within .0001" ( 0.002 mm ).
- Fast and easy set-ups without elaborate accessories: only tools needed are a micrometer and a hex key wrench.
- Precise and sharp contours, concave or convex, are consistently obtained at a full $180^{\circ}$ range.
- Made from hardened, ground and lapped alloy tool steel.
- No exposed wear surfaces. Swivels on sealed bearings.
- Wheel dresser is furnished complete with base featuring one inch adjustment.
- Graduation micrometer knob provides fine adjustment to accurately dress small radii.

## VISI-DRESS RADIUS AND ANGLE DRESSER <br> SERIES 465:

- $1^{\circ}$ Vernier markings for dressing angles.
- Magnification, through hole in the spindle, makes it possible for the operator to see how to dress the form on the grinding wheel.
- Fixed Focus Lens (3X)
- Wheel form grinding done easily and accurately
- Furnished with $90^{\circ}$ phonopoint diamond
- Compact design
- Case Overall Height ........ 4" Length ........ 8-1/4"
Swing Arm ........ $180^{\circ}$
Max. Size Grinding Wheel ........ 8" Max. Outside Radius (on wheel) ........ 5/8" approx. Max. Inside Radius (on wheel) ........ 1" approx. Spindle ........ 1" O.D. Weight ........ 11 lbs.
